## Academic employment

From 2023	<b>Assistant Professor</b> , Northwestern University Department of Economics
2022 - 2023	College Fellow, Northwestern University Department of Economics
Education	
2018 - 2022	London Business School, PhD in Economics Thesis title: "Climate change, inequality and the macroeconomy" Expected completion date: June 2022
2021	University of Chicago, Visiting Graduate Student
2016 - 2018	London Business School, MRes in Economics
2013 - 2015	Universities of Bern and Basel, MSc in International and Monetary Economics Summa cum laude, GPA $6.00/6$
2010 - 2013	University of Bern, BSc in Economics Insigni cum laude, GPA 5.72/6

# Teaching and research fields

Primary: Macroeconomics/Macro-Finance

Secondary: Climate and Energy, Inequality, Household Finance

#### Research

#### Job market paper

#### The unequal economic consequences of carbon pricing

Abstract: This paper studies how carbon pricing affects emissions, economic aggregates and inequality. Exploiting institutional features of the European carbon market and high-frequency data, I identify a carbon policy shock. I find that a tighter carbon pricing regime leads to a significant increase in energy prices, a persistent fall in emissions and an uptick in green innovation. This comes at the cost of a temporary fall in economic activity, which is not borne equally across society: poorer households lower their consumption significantly while richer households are less affected. Not only are the poor more exposed because of their higher energy share, they also experience a larger fall in their income. These indirect effects account for over 80 percent of the aggregate effect on consumption. A climate-economy model with heterogeneity in households' energy shares, income incidence and marginal propensities to consume is able to account for these facts.

The macroeconomic effects of oil supply news: Evidence from OPEC announcements, *American Economic Review*, 111(4), 2021, 1092-1125

Abstract: This paper studies how changes in oil supply expectations affect the oil price and the macroe-

Diego R. Känzig Curriculum vitae

conomy. Using a novel identification design, exploiting institutional features of OPEC and high-frequency data, I identify an oil supply news shock. These shocks have statistically and economically significant effects. Negative news leads to an immediate increase in oil prices, a gradual fall in oil production, and an increase in inventories. This has consequences for the US economy: activity falls, prices and inflation expectations rise, and the dollar depreciates, providing evidence for a strong channel operating through supply expectations.

# Capital and income inequality: an aggregate-demand complementarity (with Florin O. Bilbiie and Paolo Surico), 2021, Journal of Monetary Economics, forthcoming

Abstract: A novel complementarity between capital and income inequality leads to a significant amplification of the effects of aggregate-demand shocks on consumption. We characterize this finding using a simple model with heterogeneity in household saving and income, nominal rigidities, and capital. A fiscal policy that redistributes capital income causes further amplification, whereas redistributing profits generates dampening. After an interest rate shock, consumption inequality is more countercyclical than income inequality, consistent with the available empirical evidence. Procyclical investment also requires a more aggressive Taylor rule in order to attain determinacy, and aggravates the forward guidance puzzle.

# The distributional impact of the pandemic (with Sinem Hacioglu and Paolo Surico), European Economic Review, 134, 2021, 103680

Abstract: The top quartile of the income distribution accounts for almost half of the pandemic-related decline in aggregate consumption, with expenditure for this group falling much more than income. In contrast, the bottom quartile of the income distribution has seen the smallest spending cuts and the largest earnings drop but their total incomes have fallen by much less because of the increase in government benefits. The decline in consumers' spending preceded the introduction of the lockdown, whose partial lifting has triggered a stronger recovery in sectors with a lower contact rate. The largest spending contractions are concentrated in the most affluent regions. These conclusions are based on detailed high-frequency transaction data on spending, earnings and income from a large fintech company in the United Kingdom.

# International inflation spillovers – the role of different shocks (with Gregor Bäurle and Matthias Gubler), International Journal of Central Banking, 17(1), 2021, 191-230

Abstract: How do international price fluctuations spill over to country-specific inflation? We show that accounting for the drivers of international inflation and their effects on overall economic conditions is crucial to getting a more thorough view of spillover effects. We find substantial heterogeneity in the magnitude of spillovers, depending on the shocks driving inflation abroad. While all identified shocks are inflationary, their effects on activity, interest rates, and exchange rates differ. Disaggregated price responses suggest that these general equilibrium effects are important. We show this by looking at spillovers to Switzerland using a structural dynamic factor model relating disaggregated prices to key macroeconomic factors.

#### Work in progress

Climate policy uncertainty (with Johan Moen)

The granular effects of carbon pricing (with Hélène Rey and Jinglun Yao)

Energy prices, inequality, and aggregate demand

Housing booms and monetary policy

# Awards and grants

2021	Winner ECB Young Economist Competition (€10,000)
2021	AQR Asset Management Institute Fellowship Award $(£10,000)$
2021	Wheeler Institute for Business and Development PhD Award (£15,000)
2021	IAEE Best Student Paper Award
2021	Finalist QCGBF Young Economist Prize
2020	Professor Sir James Ball PhD Award, London Business School (£10,000)

Diego R. Känzig Curriculum vitae

2019	Research Grant from the Wheeler Institute for Business and Development (£20,000)
2019	Dwyer Ramsey Prize for the best student paper at the 27th SNDE Symposium
2016	PhD Programme Scholarship, London Business School
2016	Best Master's Degree, Faculty of Economics and Social Sciences, University of Bern
2016	VBW Excellence Award for Outstanding Master's Thesis
2015	Schmeller Prize for Best Master's Thesis

#### Professional activities

Referee for: Review of Economic Studies, American Economic Review: Insights, American Economic Journal: Macroeconomics, The Review of Economics and Statistics, Journal of Economic Theory, European Economic Review, Journal of Economic Dynamics and Control, Journal of Money, Credit and Banking, The B.E. Journal of Macroeconomics, Empirical Economics, Fiscal Studies, Energy Economics, Journal of Commodity Markets

# Teaching experience

## Undergraduate

2014, 2015	Econometrics I (Bachelor level), University of Bern
2013	Time Series Analysis I (Bachelor level), University of Bern

#### Graduate

2017, 2018	Macroeconomics I (PhD level), London Business School
2014	Essential Mathematics for Economists (Master level), University of Bern
2014	Time Series Analysis II (Master level), University of Bern

# Other relevant experience

6/2017 - 7/2020	Research Assistant for Paolo Surico, London Business School
9/2019 - 7/2020	PhD Intern, Bank of England
5/2018 - 7/2019	Academic Visitor, Bank of England
9/2015 - 6/2016	Intern Inflation Forecasting, Swiss National Bank
6/2014 - 8/2015	Quantitative Analyst, Credit Suisse

## Presentations (\*scheduled, †participated)

2022	Brussels Economic Forum*, Macroeconomic Workshop Berlin*, European Central Bank, E-Axes Forum, Potsdam Institute for Climate Impact Research, ASSA Meeting
2021	SEA Conference, EC <sup>2</sup> Conference, University of Chicago Capital Theory Seminar, University of Notre Dame, Bank of Italy, IWH-CIREQ-GW Macroeconometric Work-
